

# JOURNAL OF THE SOCIETY OF MATERIALS SCIENCE, JAPAN

## INSTRUCTION FOR CONTRIBUTORS

### 1. Scope:

Journal of The Society of Materials Science, Japan, which has been recognized as “Zairyo” in Scopus (Elsevier), is published in English as well as Japanese by the Society of Materials Science, Japan (JSMS). The “Zairyo” accepts high level "general papers" as well as "review papers" in the vast field of materials science on metal, ceramics, concrete, soil and so on, including mechanics of their materials. It has been published every month and all the articles can be downloaded via J-STAGE (<https://www.jstage.jst.go.jp/browse/jsms/-char/en>).

### 2. Eligibility of contributing authors:

The “Zairyo” is primarily a means of publication for the members of JSMS, which implies that one of the authors, at least, should be a member, honorary member, or student member of JSMS.

### 3. Submission of manuscripts:

The Society of Material Science, Japan accepts manuscripts through their online manuscript submission system. If you request your manuscript to be submitted or reviewed, go to the link below.

<https://mc.manuscriptcentral.com/jsms>

### 4. Outline of manuscript format

#### 4.1 General comments:

The author must prepare the camera-ready manuscript in A4 size (297x210mm) sheets based on our prescribed format for screening. Every manuscript submitted will go under peer review and be accepted for publication after the format has been checked by the editorial board. Authors are asked to request more detailed instruction, "**Instructions for the Preparation and Format of a Camera-Ready Manuscript**", from the editorial office of “Zairyo”. A general paper is limited to six pages, a review paper to eight. In exceptional circumstances, two additional pages at most for general and review papers may be allowed.

#### 4.2 Title, authors and abstract:

The title, subtitle (if necessary), name(s) of the author(s), affiliation(s) and mailing address(es) should be stated in this order, followed by an abstract of 200-300 words and 5-10 keywords. This information written in the reproduced paper should be the same as the original paper.

#### 4.3 Units:

SI unit systems are to be used in all texts, tables, and figures.

#### 4.4 Symbols and formulae:

Italics should be used for all variables in the main body of the text and equations, except for "sin", "cos", "grad", "rot", "div" and so on.

#### 4.5 Tables and figures:

All tables and figures including photographs should be pasted in the text, preferably on the same page as they are cited. They should include captions of approximately 20 words. Photographs must be originals. In the case of reproduced paper, all the figures, tables, and photographs, as well as their captions, should be the same as the original paper.

#### 4.6 References:

Publications, preferably in English, cited in the text should be referenced at the end of the text. All references should appear in order with the numbers in parentheses, such as [1] or [2-4]. References are to be in the following format: family name(s) of the author(s) preceded by the initials of first and/or middle names, journal-title in standard abbreviated style, number of volumes (in bold), year of publication in parentheses, and starting page number. Books should be referred by the name(s) of the author(s), book title, publisher, its location, publication year in parentheses, and/or referred page number. Proceedings should include the editor name(s) in parentheses between proceedings' title and the publisher. In the case of reproduced paper, the references should be, in principle, the same as the original paper.

#### 5. Copyright:

Copyright of accepted paper is reserved by the Society of Materials Science, Japan (JSMS).
